I am writing to express my interest in the Coordenador de Relacionamento com Cliente position at Checkout RH. While my professional background is in software engineering, I bring strong client relationship and coordination skills developed through years of direct stakeholder collaboration on complex technical projects.

In my previous roles as a Web Developer, I worked closely with clients and internal teams to understand requirements, communicate progress, and ensure deliverables met expectations. This involved regular client communication, gathering feedback, managing expectations, and coordinating between developers, designers, and business stakeholders.

One area that particularly interests me is the opportunity to apply my structured problem-solving approach and clear communication style to client relationship management. I am comfortable translating technical concepts for non-technical audiences and ensuring that client needs are understood and addressed effectively.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my client coordination and communication skills can contribute to your team.

Sincerely,

Md Shahanur Islam Shagor
