I am writing to apply for the Customer Service Specialist position at SORACOM. Your mission of connecting devices and empowering customers through IoT is genuinely interesting, and I appreciate the emphasis on building a global, remote-first team.

While my background is in software engineering, I have developed strong communication and problem-solving skills through years of client-facing work. In my role as a Web Developer, I regularly managed stakeholder communications, handled inquiries, and ensured that project requirements were met accurately and on time. I am comfortable working independently in a remote environment and have experience collaborating across different time zones and cultures.

One area that particularly interests me is your focus on using emerging AI tools to enhance efficiency. I have hands-on experience integrating AI into practical applications, including building AI-powered assistants and automation workflows. I am confident I can apply this familiarity to improve customer service processes and deliver faster, more accurate support.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am eager to contribute to SORACOM’s growth by providing excellent support to your customers and partners. I have attached my CV for your review and look forward to the possibility of discussing how I can help your team.

Sincerely,

Md Shahanur Islam Shagor
