I am writing to apply for the Customer Service Specialist position at SORACOM. Your mission of making connectivity work for a world that works together is compelling, and I appreciate the emphasis on building a global, remote-first team that values diverse perspectives.

My professional background is in software engineering, where I have developed strong problem-solving skills, attention to detail, and the ability to work independently across distributed teams. I have experience communicating clearly with both technical and non-technical stakeholders, managing multiple priorities, and ensuring accuracy in data handling and reporting.

In previous roles, I collaborated with teammates across different time zones, managed project documentation, and supported client-facing communication. I am comfortable using tools like Slack and AWS, and I am quick to learn new platforms. I also actively explore emerging AI tools to improve efficiency and creativity in my work.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am confident I can contribute to SORACOM’s customer and partner support operations with the same dedication and precision I bring to every project. I have attached my CV for your review and welcome the opportunity to discuss how I can support your team.

Sincerely,

Md Shahanur Islam Shagor
