I am writing to apply for the Biology Expert role at YO IT Consulting. The opportunity to apply domain expertise toward training next-generation AI systems aligns closely with my background in building intelligent, data-driven technologies.

My work as a software and AI engineer has involved extensive data analysis, technical document review, and content generation. I have designed systems that process complex datasets, train AI models, and produce high-quality outputs. This experience has given me a strong foundation in analyzing information, ensuring accuracy, and delivering clear, structured feedback.

One area that particularly interests me is the interdisciplinary nature of this role. I have collaborated with teams across engineering, product, and research domains, and I am comfortable working with technical documentation and translating complex information into actionable insights. My ability to work independently and manage multiple priorities makes me well-suited for a remote contractor position.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my background can contribute to your team.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
