I am writing to apply for the Specialist position at SHRI KRISHNA PLACEMENT. With a background in full-stack development and a strong understanding of e-commerce workflows, I am well positioned to contribute to the eBay marketing and web shop operations this role requires.

Through my professional experience as a Web Developer, I have built and maintained scalable web applications using Laravel, Next.js, and React. I have implemented RESTful APIs, role-based authentication, and payment gateway integrations, all of which are directly relevant to managing an e-commerce platform. My work has involved creating responsive, user-friendly interfaces and ensuring smooth data flow between frontend and backend systems.

One area that particularly interests me is the intersection of IT and e-commerce. I have developed full-stack platforms that handle product management, user accounts, and transaction workflows. These projects required a clear understanding of how online marketplaces operate, from listing products to processing orders and managing customer data.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my skills align with this role.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
