I am writing to apply for the Pharmaceutical & Clinical Research Expert role at CuraSenseAI. Your focus on evaluating clinical, biomedical, and pharmaceutical domains aligns with my technical background in building intelligent systems that process complex data and support decision-making.

Through research and development work, I have designed AI-powered platforms that integrate real-time data processing, API communication, and automated workflows. One relevant example is an AI-powered financial application where I built backend services using Express, TypeScript, and OpenAI, and implemented features such as voice-to-text transcription, PDF generation, and secure authentication. This experience required careful handling of structured data, system reliability, and cross-service integration.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my skills can contribute to CuraSenseAI’s evaluation work.

Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
