I am writing to apply for the District Associate Manager position at Meril. Meril's work in developing innovative healthcare solutions for cardiology and orthopedics, reaching over 150 countries, is impressive. I am interested in contributing to a company that directly improves patient lives through its products.

My professional background is in software engineering, where I have spent over four years building and delivering full-stack applications. Through this work, I have developed strong discipline in managing complex workflows, meeting deadlines, and maintaining clear reporting structures. These skills are directly transferable to managing sales territories, tracking performance metrics, and achieving monthly and quarterly targets.

A key part of my previous roles involved building and maintaining relationships with clients and stakeholders to ensure project success. I am accustomed to understanding client needs, communicating clearly, and coordinating efforts to deliver results. This experience aligns well with the responsibility of building strong relationships with doctors and distributors in a hospital and lab setting.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am confident that my structured approach, communication skills, and focus on achieving targets will allow me to contribute effectively to Meril's growth in the Madhya Pradesh region. My CV is attached for your detailed review.

Sincerely,

Md Shahanur Islam Shagor
