I am writing to apply for the Clinical Coding Trainer position at Torbay and South Devon NHS Foundation Trust. The opportunity to contribute to a team that directly impacts patient care quality and income recovery through accurate clinical coding is genuinely compelling. Your focus on staff development and supportive team culture aligns with my own approach to professional growth and collaboration.

Although my professional background is in software engineering rather than clinical coding, I bring transferable skills that are directly relevant to this training role. Over four years of web development experience, I have regularly designed and delivered training sessions, created comprehensive documentation, and mentored junior developers through complex technical concepts. These experiences have given me practical expertise in assessing learning needs, structuring training pathways, and providing constructive feedback to improve performance.

In my role at Explo-IT, I was responsible for onboarding new team members and conducting regular knowledge-sharing sessions on Laravel, Next.js, and API development. I developed training materials that broke down complex workflows into clear, actionable steps, and I worked closely with each developer to ensure they understood both the technical implementation and the underlying standards. This hands-on mentoring approach helped new team members become productive contributors more quickly.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I would welcome the opportunity to discuss how my training and mentoring experience can support the Clinical Coding team at Torbay and South Devon NHS Foundation Trust. I have attached my CV for your review and look forward to hearing from you.

Sincerely,

Md Shahanur Islam Shagor
