I am writing to apply for the Hypercare role at The Citation Group. Your work providing mission-critical compliance, HR, and health & safety services to over 120,000 businesses across the UK, Australia, and Canada is impressive, and I am interested in contributing to a team that supports such a large and diverse client base.

Through my professional experience as a Web Developer, I have built and maintained scalable web applications using Laravel, Next.js, and React. I have developed RESTful APIs, implemented authentication and role-based access control, and integrated payment gateways. My work has involved optimizing database performance through Eloquent query tuning and caching strategies, as well as deploying applications on Linux servers with Nginx, Apache, and Docker.

One area that particularly interests me is building reliable systems that support real-world operations. In previous work, I delivered real-time features such as chat and notifications using WebSockets, and integrated third-party services including cloud storage and social logins. I also created responsive, SEO-friendly interfaces using Tailwind CSS and modern JavaScript frameworks, ensuring a smooth user experience across devices.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my background aligns with the needs of your team.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
