I am writing to apply for the Media Monitoring & Reporting Executive position at AEA Relate. Your agency's reputation as a leading PR and communication firm in Greece is well known, and I am interested in contributing to your media monitoring team.

My background is in software engineering, where I have developed strong analytical and reporting skills. I have built full-stack applications that require careful tracking of data, real-time monitoring, and structured reporting. For example, I created a real-time server health monitoring dashboard that tracks availability and latency across multiple targets, streaming live metrics and generating clear reports. This work required the same attention to detail, critical thinking, and ability to manage multiple data streams that media monitoring demands.

I am proficient in MS Office and comfortable learning new tools and platforms quickly. I am a critical thinker who can prioritize tasks and work under pressure within tight deadlines. I have experience managing multiple projects and deliverables simultaneously, ensuring accuracy and consistency in all outputs.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am confident that my analytical mindset, attention to detail, and ability to produce accurate, timely reports would make me a valuable addition to your team. I have attached my CV for your review and welcome the opportunity to discuss how I can contribute to AEA Relate.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
