I am writing to apply for the Project Specialist Healthcare position at iMPROve Health. While my background is primarily in software engineering and AI, I bring strong project execution skills, technical problem-solving ability, and experience delivering complex systems from concept to deployment.

In my professional experience as a Web Developer, I have designed and built scalable web applications using Laravel, Next.js, React, and Node.js. I have developed RESTful APIs, implemented authentication and role-based access control, integrated payment gateways, and optimized database performance. These projects required careful planning, cross-functional coordination, and clear communication with stakeholders.

One area that particularly interests me is the opportunity to apply my technical project management skills in a healthcare context. I have experience managing full application lifecycles, from requirement analysis and architecture design to deployment and maintenance. I am comfortable working with multidisciplinary teams and translating technical requirements into actionable plans.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
