I am writing to apply for the Entry Level Administrative Assistant position at Re-cruit-Lytic. Your focus on building a supportive remote environment where team members can grow through structured training and clear workflows aligns well with how I prefer to work.

Through my experience as a software engineer, I have developed strong organizational habits and attention to detail. I regularly maintain accurate records, update documentation, and manage digital files across multiple projects. These skills transfer directly to administrative work where consistency and precision matter.

I am comfortable working with spreadsheets and internal tracking systems. In previous roles, I coordinated tasks, followed structured workflows, and communicated clearly with team members to ensure smooth operations. I work well independently and take ownership of assigned responsibilities.

In addition to my technical background, I communicate effectively across teams and am fluent in Bengali and English with working knowledge of Russian and Hindi. I enjoy collaborating in remote, international settings.

I have attached my CV for your review and would welcome the chance to discuss how I can support Re-cruit-Lytic’s daily operations.
