I am writing to apply for the San Diego position at TECHSICO. My background in full-stack web development and AI engineering aligns with the technical demands of this role.

Through my professional experience as a Web Developer, I have built scalable applications using Laravel, Next.js, React, and Node.js. I have implemented RESTful APIs, authentication systems, role-based access control, and secure payment integrations. My work also includes real-time features using WebSockets and database optimization with MySQL and Redis.

In previous work at Explo-IT, I delivered end-to-end web solutions, from backend architecture to responsive, SEO-friendly frontends. I deployed applications on Linux servers using Docker, Nginx, and CI/CD pipelines. One project I developed, the Multivendor E-commerce Management Ecosystem, demonstrates my ability to build complex systems with multiple user roles, real-time notifications, and scalable database design.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and welcome the opportunity to discuss how my skills can contribute to TECHSICO.

OBTAINABLE RNjguMjMxLjE4OS4zNA==

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
