I am writing to apply for the POS-Manager (m/w/d) position at Peter Stupp Design Mode GmbH. I understand this role focuses on brand presentation, sales analysis, and team development at the point of sale.

My background is in software engineering, where I have spent over four years building and optimizing web applications. A core part of my work involves analyzing data to identify performance issues and opportunities, which aligns with the "Data with Impact" aspect of this role. I am comfortable working with KPIs, generating reports, and using data to guide decisions.

In my previous work as a Web Developer, I regularly collaborated with cross-functional teams, communicated technical concepts to non-technical stakeholders, and managed multiple project streams simultaneously. I am used to taking ownership of tasks and delivering results in environments where priorities shift quickly.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
