I am applying for the Consultant Digitalisierung & Prozessoptimierung position at Stannek GmbH. Your focus on helping Steuerkanzleien and Mittelstand companies become more efficient and digital aligns with my own interest in using technology to solve real operational problems.

What stands out to me about this role is the combination of client advisory, project coordination, and hands-on implementation. In my professional experience as a Web Developer, I have worked directly with clients to understand their existing processes, identify bottlenecks, and introduce digital tools that improve daily workflows. I am comfortable managing projects from initial consultation through deployment and user training.

One area that particularly interests me is supporting organisations during the transition to new software systems. I have experience planning, coordinating, and implementing digital solutions while keeping clients informed and engaged throughout the project lifecycle. I also enjoy conducting workshops and training sessions to help teams adopt modern working methods confidently.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how I can contribute to your team at Stannek GmbH.

Sincerely,

Md Shahanur Islam Shagor
