I am writing to apply for the Human Resources Business Partner (HRBP) position at EDL GmbH. Your company's role as a leading European provider of AI-powered radiology and medical imaging solutions is impressive, and I am interested in contributing to the growth of your German operations.

My professional background is in software engineering, where I have spent over four years building scalable web applications and leading technical projects across international teams. This experience has given me a strong foundation in structured problem-solving, process optimization, and clear communication with both technical and non-technical stakeholders.

In my previous roles, I have worked closely with diverse teams to deliver complex projects on time. I have developed a pragmatic, solution-oriented mindset that focuses on understanding requirements, identifying bottlenecks, and implementing efficient workflows. I am comfortable managing multiple priorities and ensuring that documentation, compliance, and operational standards are maintained.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am confident that my structured approach, adaptability, and strong communication skills would allow me to contribute meaningfully to your HR team. I have attached my CV for your review and welcome the opportunity to discuss how I can support EDL's continued expansion in Germany.

Sincerely,

Md Shahanur Islam Shagor
