I am writing to apply for the Category Manager position at reboVet. Your company's 45-year track record as a leading veterinary wholesaler in Germany, serving over 30,000 products to veterinary practices, is impressive. I am drawn to the opportunity to contribute to a team that values innovation and customer-focused solutions.

Although my professional background is in software engineering rather than category management, I bring a strong analytical mindset and a structured approach to data-driven decision-making. In my work as a full-stack developer, I regularly analyzed complex datasets, identified patterns, and made recommendations that improved system performance and user experience. I am confident these analytical skills transfer directly to analyzing market trends, customer purchasing behavior, and product assortment performance.

One area that particularly interests me is the hands-on, entrepreneurial nature of this role. I have experience taking initiative, driving projects forward independently, and collaborating across teams to achieve results. I am comfortable with numbers and enjoy using data to guide decisions, whether optimizing database queries or evaluating product performance metrics.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am eager to bring my analytical abilities, quick learning capacity, and structured work style to reboVet. I have attached my CV for your review and would welcome the opportunity to discuss how I can contribute to your team.

Sincerely,

Md Shahanur Islam Shagor
