I am writing to apply for the Werkstudent Marketing position at Bearpaw GmbH. Your approach to giving real responsibility from the start and your focus on practical learning over theory strongly resonate with me. I am a Software Engineering student with hands-on experience in building and managing digital platforms, and I am looking for a role where I can contribute operationally while deepening my understanding of e-commerce and marketing.

Through my professional experience as a Web Developer, I have developed a strong digital understanding of how online shops and content management systems work. I have worked with platforms like Shopify and have built custom e-commerce solutions using Laravel and Next.js. This has given me practical knowledge of product data management, categorization, and the importance of clean, structured information for both user experience and search visibility.

One area that particularly interests me is the operational side of SEO and content management. In my development work, I have implemented meta tags, structured data, and internal linking strategies to improve site performance. I am comfortable working with data in Excel and Google Sheets, preparing evaluations, and ensuring tasks are completed accurately and on time. I am also used to working with clear briefings and delivering consistent results without needing constant oversight.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my background and working style can support the Bearpaw marketing team.

Sincerely,

Md Shahanur Islam Shagor
