I am writing to apply for the Grafiker / Brand Designer position at Bearpaw GmbH. What stands out to me about Bearpaw is the opportunity to build a visual identity system from the ground up for a brand with real history and global reach. The idea of shaping how a product feels before a customer ever holds it is exactly the kind of challenge I want to be part of.

My background includes hands-on experience with Figma for creating design systems and reusable templates. I have worked on projects where I designed consistent visual languages, ensuring that colors, typography, and layout rules could be applied correctly by non-designers across different teams. This aligns directly with your need for a living CI system that storytellers, e-commerce managers, and agency partners can actually use.

In previous work, I built responsive UIs and maintained design consistency across web applications using Tailwind CSS and MaterialUI. I approach design with a system-thinking mindset, focusing on scalability and reusability rather than one-off solutions. I am comfortable working from a vague briefing and translating it into a clear visual direction that can be presented and defended.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how I can contribute to building Bearpaw’s visual identity.

Best regards, Md Shahanur Islam Shagor

Sincerely,
