I am writing to apply for the Social Media Manager (m/w/d) position at HEBU GmbH. The opportunity to build a brand's social media presence from scratch, with real ownership and creative freedom, is exactly the kind of challenge I am looking for.

Although my professional background is in software engineering, I have developed strong skills in visual content creation and digital communication. I am proficient with Figma for graphic design and have experience producing and editing video content. My technical mindset helps me quickly adapt to new tools and platforms, which means I can become effective with Premiere Pro, CapCut, After Effects, or Canva without a long learning curve.

What stands out to me about this role is the emphasis on authentic storytelling across Instagram, TikTok, YouTube, and LinkedIn. I understand that effective social media is not just about posting content, but about building a narrative that resonates with the audience. I am comfortable working independently, managing content calendars, and coordinating projects from planning through to publication and analysis.

In addition to my technical and creative skills, I work effectively across teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the chance to discuss how I can contribute to building HEBU's social media presence with substance and authenticity.

Sincerely,

Md Shahanur Islam Shagor
