I am writing to express my interest in the Principal Legal Council - Corporate Law & Corporate Financing position at Flix. I understand this role requires deep legal expertise in corporate governance and financing, and while my professional background is in software engineering, I bring strong analytical capabilities, structured thinking, and experience managing complex, multi-stakeholder systems.

In my work as a full-stack developer, I have designed and maintained systems that required precise access control, data integrity, and audit-ready workflows. I built role-based authentication systems, implemented secure payment gateways, and developed real-time monitoring dashboards that tracked system health and availability. These experiences have sharpened my ability to think systematically about governance, risk, and compliance in technical environments.

One area that particularly interests me is the coordination of complex processes across multiple teams and stakeholders. In previous projects, I have worked closely with product managers, designers, and business teams to align technical implementation with operational requirements. I am comfortable managing parallel workstreams, maintaining clear documentation, and ensuring that every detail is accounted for in high-stakes environments.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application, and I would welcome the opportunity to discuss how my analytical and organizational skills could contribute to Flix’s legal and corporate governance operations.

Sincerely,

Md Shahanur Islam Shagor
