I am writing to apply for the Accountant/ Buchhalter (m/w/d) position at Kyocera Unimerco Tooling GmbH. While my professional background is in software engineering, I bring strong analytical capabilities, a systematic approach to data management, and a proven ability to work with complex, structured information. I am confident these skills translate effectively into the accounting and financial reporting responsibilities outlined in the role.

Through my work as a software engineer, I have developed a deep understanding of data integrity, reconciliation, and process automation. I have designed and maintained systems that handle financial transactions, user balances, and reporting workflows. This experience required meticulous attention to detail, strict adherence to data accuracy, and the ability to trace and resolve discrepancies. I am comfortable working with large datasets and ensuring completeness and correctness, which aligns directly with tasks such as monitoring balance sheet accounts and preparing trial balances.

One area that particularly interests me is the opportunity to support the introduction of new accounting systems and processes. My technical background in system architecture, database management (MySQL, PostgreSQL), and workflow automation positions me to contribute effectively to such projects. I am experienced in analyzing requirements, implementing structured solutions, and ensuring data flows correctly between systems. I am also proficient with MS Office, particularly Excel, and can quickly adapt to ERP systems.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments. I am a hands-on, self-sufficient worker who takes ownership of tasks and follows through to completion.

I have attached my CV for your review. Thank you for considering my application. I look forward to the possibility of contributing to Kyocera Unimerco Tooling GmbH.

Sincerely,

Md Shahanur Islam Shagor
