I am writing to apply for the Top-Berater position at Die Einkommensoptimierer. While my professional background is in software engineering rather than financial services, I bring a strong foundation in analytical thinking, autonomous work, and entrepreneurial ownership that aligns well with the independent, results-driven nature of this role.

Through my work as a full-stack developer, I have built complex systems from the ground up, including AI-powered financial applications that required understanding user workflows, designing secure architectures, and managing end-to-end delivery. These projects demanded the same kind of strategic thinking, client focus, and accountability that a consulting role requires.

One area that particularly interests me is the emphasis on building long-term value and recurring income. In my projects, I have consistently focused on creating sustainable, maintainable systems rather than quick solutions. This mindset translates naturally to client relationship management and portfolio development.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am ready to apply my discipline, learning ability, and drive to succeed in this new field. I have attached my CV for your review and welcome the opportunity to discuss how I can contribute to your team.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
