I am writing to apply for the Amazon Account Manager / E-Commerce Consultant position at REVOIC GmbH. Your focus on using KI-Tools to deliver faster and more scalable results for well-known brands like SEVERIN and Ritter Sport stands out to me. I am interested in contributing to a team that combines strategic account management with practical AI integration.

My background is in full-stack development and AI engineering. I have built production systems that integrate AI tools for automation, analysis, and reporting. For example, I developed an AI-powered financial application where I integrated OpenAI APIs to create intelligent assistants, automated data processing from Google Sheets, and generated PDF reports. This experience directly aligns with your need for someone who can use KI-Tools actively for analysis and automation.

In addition to my technical work, I have experience managing client relationships and coordinating projects from start to finish. As a Web Developer, I was responsible for client communication, understanding requirements, and delivering solutions that met their business goals. I am comfortable creating data-driven reports, presenting findings to clients, and thinking strategically about budget and performance.

I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and look forward to the opportunity to discuss how I can contribute to REVOIC’s success.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
