I am writing to apply for the Clinical Research Professional position at CuraSenseAI. Your focus on evaluating clinical, biomedical, or pharma-related content aligns with my interest in applying rigorous analytical methods to real-world research challenges.

Through my work in AI and autonomous systems, I have developed strong skills in data analysis, system evaluation, and performance assessment. For example, in my Wireless Vision-Aid for the Blind project, I evaluated object detection accuracy using YOLOv8n, optimized latency, and documented system performance under real-world conditions. This required careful measurement, comparison against benchmarks, and clear reporting of results.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my research and analytical experience can contribute to CuraSenseAI’s evaluation work.

Sincerely,

Md Shahanur Islam Shagor
