I am writing to apply for the Service Desk Analyst position at Slipstream Life Sciences. Your focus on providing managed IT solutions for emerging pharma and biotech organizations is a compelling mission, and I am interested in contributing to your team's commitment to streamlining IT support.

My technical background includes hands-on experience with Linux, Windows, and server environments, along with strong troubleshooting skills for hardware, software, and network-related issues. I have supported end users remotely, resolving issues related to VPN, authentication, and application functionality. I am comfortable working with ticketing systems and documenting follow-ups to ensure clear communication and issue resolution.

In previous work, I have provided direct technical support to users, addressing password problems, software installations, and general how-to inquiries. I have also worked with multifactor authentication and single sign-on concepts, which aligns with the responsibilities outlined for this role. My ability to multitask and communicate clearly has helped me maintain effective support workflows.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my skills can support Slipstream Life Sciences. Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
