I am writing to apply for the Social Media Manager position at Be Balanced Co. Although my professional background is in software engineering, I bring a strong technical understanding of digital platforms, content management, and user engagement that I believe can add value to your team.

Through my work as a full-stack developer, I have built and maintained several content-driven web applications. I designed responsive, SEO-friendly interfaces using Next.js, Tailwind CSS, and Material UI, and I managed media assets, user-generated content, and multilingual support. These experiences gave me a practical understanding of how digital content reaches and engages audiences.

I also have hands-on experience with tools like Figma for UI design, Firebase for real-time data, and various analytics and monitoring systems. I am comfortable working with content management workflows, scheduling systems, and performance tracking, all of which are relevant to managing social media presence effectively.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my background can support Be Balanced Co.’s social media and content goals.

Sincerely,

Md Shahanur Islam Shagor
