I am writing to apply for the HR Assistant position at Randstad USA. Although my professional background is in software engineering, I have developed strong organizational discipline, attention to detail, and a systematic approach to managing complex workflows that I believe are directly transferable to this role.

Through my experience building and maintaining full-stack applications, I have become highly proficient at managing multiple concurrent tasks, tracking progress meticulously, and ensuring that every component meets its requirements before moving forward. These habits of precision and thoroughness align well with the compliance-driven nature of HR work.

In previous roles, I have worked closely with cross-functional teams, coordinated with stakeholders to gather requirements, and maintained clear documentation throughout project lifecycles. I am comfortable working independently in remote environments and take ownership of my responsibilities from start to finish.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
