I am writing to express my interest in the Learning And Development Specialist position at Dagen. While my professional background is in software engineering, I bring strong project coordination, content organization, and documentation skills that align well with the responsibilities of this role.

Throughout my career as a full-stack developer, I have consistently managed complex projects with multiple stakeholders, tracked timelines, and ensured deliverables were met on schedule. I am comfortable working independently, adapting to shifting priorities, and driving tasks to completion without requiring constant direction.

One area where I have developed significant strength is in organizing and refining technical information. I have experience creating clear documentation, training materials, and structured content that makes complex concepts accessible to different audiences. I am skilled at summarizing detailed information into concise, learner-friendly formats.

I am a self-directed learner who enjoys solving problems and finding efficient ways to get things done. I work well in remote environments and communicate clearly with both technical and non-technical colleagues. I am fluent in Bengali and English, with working knowledge of Russian and Hindi.

I have attached my CV for your review. Thank you for considering my application.
