I am writing to apply for the Supply & Logistics Coordinator role at Nabu Casa. Your mission to build a sustainable, community-funded open-source smart home platform is something I genuinely respect, and I would welcome the opportunity to contribute to your hardware operations.

Although my professional background is in software engineering, I have developed strong analytical, organizational, and process-building skills that are directly applicable to supply chain coordination. I am comfortable working with data to make informed decisions, documenting workflows, and operating independently with full ownership of outcomes.

One area that particularly interests me is your emphasis on using AI-assisted workflows to improve operational efficiency. I have hands-on experience integrating AI tools and automation into real-world systems, and I am confident I can apply that mindset to streamline purchase orders, inventory tracking, and logistics coordination.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
