I am writing to apply for the Supply & Logistics Coordinator role at Nabu Casa. Your mission to build a sustainable, community-funded open-source smart home platform is genuinely compelling. The opportunity to own the end-to-end hardware supply chain for a product used by millions of households is exactly the kind of operational challenge I want to take on.

Although my professional background is in software engineering, I have developed strong analytical and process-oriented skills that are directly applicable to supply chain coordination. I have experience using AI tools and automation to streamline workflows, which aligns with your emphasis on using modern tools to improve operational efficiency. I am comfortable working with data to make informed decisions and have a track record of documenting processes and creating repeatable workflows.

In my previous roles, I managed end-to-end project delivery, coordinated with multiple stakeholders, and took ownership of complex systems. I am used to working independently with minimal structure and driving issues to resolution. I have experience working with international teams and communicating across cultural boundaries, which would support coordination with manufacturers and distributors globally.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my skills can contribute to Nabu Casa’s continued growth.

Sincerely,

Md Shahanur Islam Shagor
