I am writing to apply for the Supply & Logistics Coordinator position at Nabu Casa. Your mission to build a sustainable, community-funded open-source smart home platform is something I genuinely respect, and I am drawn to the autonomy and ownership this role offers.

My background is in software engineering, where I have spent years designing, building, and maintaining complex systems. This experience has given me a strong analytical mindset, the ability to break down problems into manageable parts, and a disciplined approach to documentation and process improvement. I am comfortable working with data to make informed decisions and have a track record of creating standard operating procedures for the systems I build.

In my professional experience as a Web Developer, I coordinated with stakeholders, managed project timelines, and ensured smooth delivery across multiple teams. I am used to taking full ownership of my work, identifying bottlenecks, and driving issues to resolution without needing constant oversight. I am also familiar with AI tools and automation workflows, which I have integrated into my projects to improve efficiency.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am confident I can bring structure, reliability, and a problem-solving mindset to your supply chain operations. I have attached my CV for your review and look forward to the possibility of contributing to Nabu Casa’s continued growth.

Sincerely,

Md Shahanur Islam Shagor
