I am writing to apply for the Supply & Logistics Coordinator position at Nabu Casa. Your work behind Home Assistant, the world's largest open-source smart home platform, is genuinely impressive. The mission to keep privacy, choice, and sustainability at the core while serving over two million households is something I find meaningful.

My background is in software engineering, but I bring a strong analytical mindset, experience with AI-assisted workflows, and a practical understanding of automation that aligns with how Nabu Casa approaches operational efficiency. I have worked extensively with data analysis, reporting, and process documentation in my development work, which maps well to the analytical and structural aspects of this role.

In previous work, I have been responsible for end-to-end delivery of complex systems, which required coordinating with multiple stakeholders, managing timelines, and resolving issues independently. I am comfortable taking ownership of a function, identifying bottlenecks, and creating repeatable processes that scale. The idea of building SOPs and improving workflows from the ground up is something I have done before and genuinely enjoy.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
