I am writing to apply for the Supply & Logistics Coordinator role at Nabu Casa. The mission behind Home Assistant and the Open Home Foundation is genuinely inspiring, and I appreciate how your organization prioritizes privacy, choice, and sustainability in the smart home space.

My background is in software engineering, where I have developed strong analytical and problem-solving skills. I have experience working with data, building automated workflows, and using modern tools to improve efficiency. I am comfortable analyzing forecast data and using reporting to support decision-making, which directly connects to the analytical mindset this role requires.

One area where I can contribute is in bringing structure and documentation to processes. In my previous work, I have created clear documentation and standard operating procedures for technical systems. I am confident I can apply the same approach to supply chain workflows, helping to build repeatable processes as Nabu Casa scales.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am ready to take ownership of the end-to-end hardware flow and contribute to Nabu Casa's continued growth. I have attached my CV for your review and look forward to discussing how I can support your team.

Sincerely,

Md Shahanur Islam Shagor
