I am writing to apply for the Supply & Logistics Coordinator role at Nabu Casa. Your work behind Home Assistant, the world's largest open-source smart home platform, is genuinely impressive. The mission to build sustainable, privacy-focused technology that serves millions of real homes is something I find meaningful.

Although my professional background is in software engineering, I have developed strong analytical and problem-solving skills that are directly applicable to this role. I am comfortable working with data to make informed decisions, and I have experience using AI tools and automation to improve workflows and efficiency.

In previous work, I have taken ownership of complex systems end-to-end, documented processes, and built repeatable workflows. I am used to operating with autonomy and taking initiative to resolve issues. I enjoy bringing structure to operations and continuously finding ways to improve how things work.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

WONDEROUSLY

Sincerely,

Md Shahanur Islam Shagor
