I am writing to apply for the Senior CRM Consultant HubSpot role at ADLOCA GmbH. Your approach to data-driven performance marketing and long-term client partnerships aligns with how I prefer to work: focused on measurable outcomes and clear communication.

Through my work as a full-stack engineer, I have built and automated complex systems that connect multiple platforms, manage user roles, and process data in real time. I have integrated third-party services, set up authentication workflows, and designed reporting pipelines. These experiences have given me a practical understanding of how to structure CRM logic, automate lead nurturing, and ensure clean handoffs between marketing and sales systems.

One area that particularly interests me is using AI tools to improve efficiency in marketing workflows. I have worked with AI APIs and automation in previous projects, and I see clear applications for workflow drafting, segmentation, and reporting in a CRM context. I am comfortable taking ownership of client accounts, translating business goals into system configurations, and presenting results directly.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I would welcome the opportunity to discuss how my background in system automation, client-facing delivery, and AI integration can contribute to ADLOCA’s team. My CV is attached for your review.

Sincerely,

Md Shahanur Islam Shagor
