I am writing to apply for the Gesamtbanksteuerungsspezialist (m/w/d) fˆ…r Marktpreis- und Liquiditˆtsrisiko position at Polarstern Experts. While my professional background is in software engineering, I bring strong analytical capabilities, structured thinking, and experience building complex, data-driven systems that align with the analytical depth this role requires.

Through my work as a Web Developer, I have designed and developed scalable web applications using Laravel and Next.js, built and integrated RESTful APIs, and optimized application performance through Eloquent query tuning, caching strategies, and database indexing. These responsibilities required careful analysis, modeling, and a structured approach to problem-solving.

One area that particularly interests me is the modeling and analysis of complex systems. In my projects, I have worked extensively with databases like MySQL and PostgreSQL, designing schemas, writing optimized queries, and ensuring data integrity. This experience has strengthened my ability to work with structured data, perform impact analysis, and build reliable systems.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my analytical and technical skills can contribute to your team. Thank you for your consideration.

Sincerely,

Md Shahanur Islam Shagor
