I am writing to apply for the IT Systemadministrator Infrastruktur & KI Consultant role at Intercon Solutions GmbH. The combination of infrastructure administration, automation, and AI consulting described in the position aligns directly with my technical background and professional interests.

Through my professional experience, I have worked extensively with Linux environments, Docker containerization, and cloud platforms including AWS and Google Cloud. I have deployed and maintained production systems using Nginx and Apache, set up CI/CD pipelines for automated deployments, and managed server monitoring with tools like Prometheus and Grafana. These skills directly support the administration and development of modern IT infrastructures mentioned in the role.

One area that particularly interests me is the integration of AI solutions into existing infrastructure. I have built AI-powered applications using OpenAI APIs and Replicate, developed real-time object detection systems with YOLOv8n running on edge devices, and implemented automation workflows that reduce manual operational overhead. I am comfortable analyzing existing system landscapes and developing future-ready concepts that combine infrastructure reliability with intelligent automation.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my background in infrastructure, automation, and AI can contribute to Intercon Solutions GmbH.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
