I am writing to apply for the Performance Marketing Manager - Freelancer role at FinMent GmbH. Your mission to democratize access to institutional investment strategies through technology is compelling, and I am interested in contributing to a fast-growing FinTech startup.

My background is in full-stack software engineering, where I have developed strong analytical and process-oriented skills. I have experience building and monitoring complex systems, analyzing performance data, and optimizing workflows. These skills translate directly to data-driven marketing funnel analysis and KPI reporting.

In previous work, I took ownership of technical deliverables, collaborated across teams, and consistently focused on measurable outcomes. I am comfortable working in a startup environment where responsibility extends beyond a defined role.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my analytical and technical background can support FinMent’s growth.

Sincerely,

Md Shahanur Islam Shagor
