I am writing to apply for the IT Architekt / IT Berater (m/w/d) Digitale Transformation position at Intercon Solutions GmbH. The combination of strategic IT architecture, digital transformation, and public-sector projects described in the role aligns well with my experience in designing and modernizing complex IT systems.

Through my professional work as a Web Developer, I have developed and evolved modern IT architectures using Laravel, Next.js, and Node.js. I have analyzed existing IT landscapes, identified areas for improvement, and implemented scalable solutions that integrate infrastructure, applications, and interfaces. My experience includes performing architecture reviews and evaluating technical approaches to ensure alignment with strategic goals.

One area that particularly interests me is the integration of security and data protection requirements into modern IT solutions. In my projects, I have implemented authentication systems, role-based access control, and secure payment gateways. I have also worked with cloud technologies including AWS and Google Cloud, and used Docker and CI/CD pipelines to streamline deployment and maintain system reliability.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my background can contribute to your digital transformation projects.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
