I am writing to apply for the Marketing Operations & Project Manager position at CKM Group. Your work in eHealth and telemedicine, particularly the focus on accessible, technology-driven healthcare solutions, stands out to me. I am drawn to the challenge of coordinating complex marketing initiatives that directly impact patient access and quality of life.

While my technical background is in software engineering, my day-to-day work has always been rooted in project management. Over the past four years, I have planned, prioritized, and tracked multiple web development projects simultaneously, coordinating timelines and resources across internal teams and external partners. This experience has given me a structured approach to project coordination and a strong sense of ownership over delivery.

A relevant example is my work on a multi-vendor e-commerce ecosystem, where I managed the full project lifecycle from requirement gathering with stakeholders to deployment. This involved coordinating between frontend and backend developers, aligning priorities, managing timelines, and ensuring smooth communication across all parties. I also handled reporting and data preparation for leadership, similar to the reporting and organizational management responsibilities outlined in this role.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am confident that my organizational skills, hands-on project coordination experience, and ability to manage multiple priorities would allow me to support your marketing team effectively. I have attached my CV for your review and welcome the opportunity to discuss how I can contribute to CKM Group.

Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
