I am writing to apply for the Performance Creative Producer role at CKM Group. Your work in eHealth and telemedicine, particularly the focus on making healthcare more accessible through modern digital solutions, is an area I find genuinely interesting.

My professional experience is grounded in full-stack web development, but my approach has always been design-conscious. I have built responsive, SEO-friendly interfaces using Next.js, React, and Tailwind CSS, and I regularly use Figma to prototype and refine user experiences before writing code. I understand how visual design, layout, and interaction patterns directly impact user engagement and conversion.

One area where I bring a practical edge is in integrating AI into creative workflows. In recent projects, I have worked with OpenAI and Replicate APIs to build intelligent assistants and automated image processing features. I am comfortable using modern AI tools to speed up production, generate assets, and iterate quickly, which aligns directly with your focus on KI-gestˆ…tzte Workflows and efficient creative production.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my background in creative development and AI-driven workflows can contribute to CKM Group’s growth initiatives.

Sincerely,

Md Shahanur Islam Shagor
