I am writing to apply for the Technischer Einkˆufer mit Teamleiterfunktion position at connect people & company GmbH, supporting KITZMANN GmbH. While my professional background is in software engineering, I bring strong analytical thinking, structured process management, and cross-functional collaboration skills that are directly relevant to this role.

Through my experience as a Web Developer, I have worked closely with stakeholders across departments to gather requirements, prepare documentation, and ensure alignment between technical teams and business goals. This has given me a practical understanding of how to manage procurement-related workflows, evaluate technical specifications, and coordinate with multiple parties to meet project needs.

One area that particularly interests me is process optimization. In my previous roles, I have actively contributed to improving workflows, identifying inefficiencies, and implementing structured solutions. I am comfortable working with data, analyzing market information, and supporting decision-making through clear documentation and reporting.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am confident that my structured approach, technical understanding, and ability to work collaboratively would allow me to contribute meaningfully to your team. I have attached my CV for your review and welcome the opportunity to discuss how I can support KITZMANN GmbH in this role.

Sincerely,

Md Shahanur Islam Shagor
