I am writing to apply for the Junior Online Marketing position at FinMent GmbH. Your mission to democratize access to institutional investment strategies through innovative technology is something I find genuinely compelling, and I would welcome the opportunity to contribute to a fast-growing FinTech startup in Berlin.

Through my professional experience as a Web Developer, I have built and maintained scalable web applications using Laravel and Next.js, created responsive, SEO-friendly user interfaces with Tailwind CSS, and integrated third-party services including payment gateways and cloud storage. I have also worked on AI-powered applications, such as an AI-powered financial app that used OpenAI and AWS services for intelligent assistance and automation. This technical foundation allows me to contribute effectively to the development of digital campaigns, landing pages, and technology-driven marketing initiatives.

The role's emphasis on interdisciplinary collaboration and using modern technology to create high-quality content matches my working style. I have experience working closely with cross-functional teams, managing my own areas of responsibility, and taking ownership of projects from concept to deployment. I am comfortable in startup environments where short decision-making paths and direct impact are part of daily work.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I look forward to the possibility of discussing how I can contribute to FinMent's continued growth and success.

Sincerely,

Md Shahanur Islam Shagor
