I am writing to apply for the Investment Analyst position at DeltaValue GmbH. Your focus on capital markets education and client support aligns with my interest in combining analytical rigor with clear communication.

My background is in software engineering and data-driven system design. Through professional experience and project work, I have developed strong skills in data analysis, process automation, and precise reporting. I am comfortable working with structured data, following established workflows, and maintaining accuracy under deadlines.

In previous work, I built full-stack applications that required careful data handling, API integration, and real-time monitoring. These projects taught me to break down complex problems, document processes clearly, and deliver reliable results. I enjoy working systematically and continuously improving my knowledge.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am currently based in Russia and looking to relocate to Essen. I have attached my CV for your review and would welcome the opportunity to discuss how I can contribute to your team.

Sincerely,

Md Shahanur Islam Shagor
