I am writing to apply for the Senior Service Delivery Manager position at K-tronik GmbH. The role combines technical service management with customer relationship building, which aligns with my experience delivering complex software projects while maintaining strong client communication.

Through my professional experience as a Web Developer, I have managed end-to-end project delivery, coordinated with internal teams and external stakeholders, and ensured that service agreements were met. I have experience building KPI frameworks, conducting performance analysis, and reporting results to management. My work involved identifying bottlenecks, performing risk assessments, and implementing corrective measures to maintain project timelines and service quality.

One area that particularly interests me is the customer-facing aspect of this role. I have regularly conducted project reviews, collected client feedback, and developed customized solutions based on specific requirements. Acting as the bridge between technical teams and clients, I have learned to communicate proactively and clearly, ensuring alignment on both sides.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my background in service delivery and project management can contribute to K-tronik’s team.

Sincerely,

Md Shahanur Islam Shagor
