I am writing to apply for the Lohnbuchhalter (gn) position at Vality One Recruitment GmbH. While my background is in software engineering, I bring a strong foundation in structured data management, process automation, and meticulous attention to detail that directly supports the responsibilities of this role.

Through my professional experience as a Web Developer, I have developed a disciplined approach to managing complex datasets, ensuring data integrity, and maintaining accurate records. I have worked extensively with MySQL and PostgreSQL databases, designing schemas, writing optimized queries, and generating detailed reports. These skills translate directly to the tasks of maintaining employee master data, creating certificates, and preparing evaluations.

In previous roles, I have been responsible for building systems that require secure handling of sensitive information, clear documentation, and reliable communication with stakeholders. I am comfortable working independently and take ownership of processes from start to finish. My experience with MS Office and various software tools ensures I can quickly adapt to payroll-specific systems like DATEV.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application. I look forward to the opportunity to discuss how my skills can contribute to your team.

Sincerely,

Md Shahanur Islam Shagor
