I am writing to apply for the AgentIn position for the energy project at hey contact heroes GmbH. The opportunity to support a modern team working on sustainable energy solutions is genuinely interesting to me, and I am confident I can contribute positively to your customer-facing operations.

While my background is in software engineering, I have extensive experience working with computers and digital communication tools. I am comfortable managing multiple tasks, handling inquiries systematically, and using technology to deliver reliable support. Working from home is something I am already accustomed to, and I have the discipline to work independently while staying aligned with team goals.

In previous roles, I have communicated directly with clients and stakeholders to understand their needs, provide clear explanations, and resolve issues efficiently. I approach every interaction with patience, respect, and a focus on finding practical solutions. I am comfortable working in shifts and adapting to different schedules as required.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am ready to bring my reliability, computer proficiency, and customer-focused mindset to your team. I have attached my CV for your review and would welcome the chance to discuss how I can support your energy project.

Sincerely,

Md Shahanur Islam Shagor
