I am applying for the Assistente Administrativo Remoto position. Although my professional background is in software engineering, I have developed strong organizational discipline, attention to detail, and process management skills through years of building and maintaining complex systems.

In my previous work as a web developer, I managed multiple project workflows simultaneously, coordinated with stakeholders, maintained documentation, and ensured smooth information flow between technical and non-technical team members. These experiences have given me a practical understanding of administrative support, file organization, and structured communication.

One area that particularly interests me is the opportunity to work fully remotely. I have been working remotely for several years and am comfortable managing tasks independently, meeting deadlines, and communicating clearly across time zones. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international environments.

I am a quick learner who adapts easily to new tools and processes. I approach every task with attention to detail and a focus on getting things done efficiently.

I have attached my CV for your review and would welcome the opportunity to discuss how I can support your administrative operations.

Thank you for your consideration.

Sincerely,

Md Shahanur Islam Shagor
