I am writing to apply for the Triage Paralegal position at General Legal (YC26). Your focus on legal triage and efficient case handling caught my attention, and I believe my background in structured problem-solving and process management would be valuable in this role.

Through my work as a software engineer, I have developed strong analytical and organizational skills. Building complex systems with role-based access control, authentication workflows, and secure data management has trained me to handle detailed information accurately and efficiently. These skills translate well to reviewing, categorizing, and prioritizing legal cases.

One area that particularly interests me is the intersection of technology and legal operations. My experience designing systems that process large volumes of data, enforce rules, and maintain audit trails has given me a practical understanding of how to manage information flows and ensure accuracy under pressure.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my skills can contribute to the General Legal team.

Sincerely,

Md Shahanur Islam Shagor
